

SALOMON ADRIAN BROU

Backend Developer (Python)

adrian690@hotmail.fr | (980) 358-1576 | Troutman, NC
adrianbrou.com | linkedin.com/in/adrianbrou | github.com/Adrianbrou

PROFESSIONAL SUMMARY

Backend Developer with a Master's in Software Engineering. I designed and shipped TrainerOS (aftrainer.app), a gym management platform used daily by 50+ trainers and clients. I own the full product: business logic, database design, AI features, and deployment. I also built and deployed a multi-tenant SaaS CRM on AWS with CI/CD. Currently contracted at Juice Labz LLC migrating a golf fitness app to Go and React Native.

TECHNICAL SKILLS

Backend: Python, Go, FastAPI, Flask, REST APIs, JWT Auth, RBAC, Redis, WebSockets
Databases: PostgreSQL, Supabase (RLS, Realtime, Edge Functions, Storage), PostGIS, SQLAlchemy, Alembic, CTEs, Window Functions
DevOps & Cloud: AWS (ECS Fargate, RDS, ECR, S3, VPC, IAM, Secrets Manager), Docker, GitHub Actions CI/CD, Vercel, Cloudflare, Web Push (VAPID), Linux

PROFESSIONAL EXPERIENCE

Backend Developer, Contractor

Juice Labz LLC (Streak Performance) | Remote | Dec 2025 - Present

- ▶ Migrating a golf fitness web app into a mobile app using Go and React Native (Expo). Working directly with the founder on architecture and feature decisions.

Data Analyst & Backend Developer

Anytime Fitness | Huntersville, NC | 2022 - Present

- ▶ Designed and shipped TrainerOS (aftrainer.app), a gym management platform used daily by 50+ trainers and clients. I own the product end-to-end: business logic, features, database, AI layer, and deployment on Vercel.
- ▶ Built the full Supabase backend: 12-table schema, 25 SQL migrations, row-level security policies, Postgres security-definer functions, real-time subscriptions, and private file storage with signed URLs.
- ▶ Added 7 AI actions through Supabase Edge Functions (Claude API) including workout suggestions, coaching notes, PR predictions, nutrition plans, and weekly recaps.
- ▶ Set up real-time chat, Web Push notifications (VAPID), client self-registration via database triggers, and CSV/PDF export.
- ▶ Optimized PostgreSQL queries with CTEs and window functions for sub-second response times across 1,500+ records.

Freelance Full Stack Developer | Independent | Côte d'Ivoire | 2020 - 2021

- ▶ Built a restaurant website end-to-end for a client: backend, frontend, menu management, reservations, and customer-facing UI using Python and Flask.

Software Engineering Intern | Freelance Projects | Côte d'Ivoire | 2018 - 2020

- ▶ Built REST APIs and database schemas for client projects. Gathered requirements and delivered solutions directly to clients.

DEPLOYED APPLICATIONS

SaaS Gym CRM Backend (AWS) | FastAPI, PostgreSQL, Redis, Docker, AWS (ECS Fargate, RDS, ECR), GitHub Actions, pytest

- ▶ Multi-tenant CRM with 35+ endpoints, JWT auth, RBAC, Redis caching, and 52 passing tests (unit + integration).
- ▶ Containerized with Docker, deployed to ECS Fargate with RDS. Full CI/CD via GitHub Actions. Secrets stored in AWS Secrets Manager.

FuelCast (Gas Price Prediction App) | FastAPI, React Native, PostgreSQL, PostGIS, Google Places API

- ▶ Mobile app that predicts gas price trends with PostGIS geospatial queries and a statistical forecasting engine. Deployed and in daily use.

AI Coding Agent (Jarvis) | Python, Gemini API, Multi-Provider Strategy Pattern

- ▶ CLI agent that accepts a coding task and loops through file reads, writes, and execution until complete. Sandboxed with path validation.

EDUCATION

Master's in Software Engineering - Groupe École Supérieure de Commerce, Côte d'Ivoire (2020)

Bachelor's in Software Engineering - École Supérieure de Commerce, Côte d'Ivoire (2017)

Associate in Arts (In Progress) - Central Piedmont Community College, Charlotte, NC (Expected 2026)

Certifications: SQL Developer (Oracle) · Python Developer · Git/GitHub/GitLab · Linux CLI · AWS Infrastructure · Backend Developer Path - Boot.dev; Go track in progress

Languages: English (Professional), French (Native)
